DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This 1 1/2 story bungalow is constructed of rock-faced concrete block; it is three bays wide by two bays deep, and faces south on a low basement. Its broad hipped roof is covered with asphalt shingles, and extends beyond the core of the building to result in open porches on the north and south. The south (front) porch has four cast concrete fluted half-columns with crocketed capitals supported on concrete-block pedestals. Under this porch, the main entrance - offset to the right of center - has a narrow door with a large concrete lintel, and is flanked on either side by a tall 1/1 sash window. The two bays of the east facade are punctuated by a single 1/1 sash on the left, and a double 1/1 sash on the right. All windows have cast-concrete lintels and sills. A cast water table surrounds the building.

The half-story is lighted by a shed dormer on the east slope of the roof and a hipped dormer on the south; both hold double 1/1 sash windows. A corbeled brick interior chimney rises at the rear.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This building exemplifies the Bungalow style of early 20th century domestic architecture, expressed through the use of the cast-concrete building technology which had recently come into vogue at the time of the house's construction. Its overall form is esthetically pleasing, and its unusual cast detailing is especially noteworthy.
